Dermatologic Surgery: Focus on Skin Cancer

Physician Course Description

The ASMS is pleased to present a new dermatologic educational program, with a focus on skin cancer treatment, the Mohs micrographic surgery procedure, and related topics. *Participants are invited to actively participate in audience discussions and (per email notifications) bring their own challenging cases for interpretation by expert panel members.*

Program Overview

Participate in an innovative, enriching CME program while enjoying a relaxed Memorial Day weekend schedule amidst the beauty and serenity of this verdant resort. Please view the Hotel Information page for an overview of the Omni Amelia Island Resort Plantation and nearby town of Fernandina Beach.

This year's *Focus on Skin Cancer* features a variety of advanced surgical topics, melanoma presentations, interactive panels, our first ABD MDS exam review session, as well as a variety of political and practice management topics. Our fully equipped microscope lab contains Mohs cases as well as a variety of brand-new "unknowns", plus small-group video microscope presentations designed to reinforce key histopathology concepts.

Topic Overview

- Best of JAAD Article Review
- Complex and Unusual Non-Melanoma Skin Cancer
- Cutaneous Reactions to Chemotherapy and Biologics
- Ear Defect Reconstruction
- Linear Repairs
- Literature Updates
- Melanoma, Non-Melanoma and Reconstruction Interactive Panels
- Member-International Forum Presentations
- Metastatic Melanoma
- Midface Repairs
- Neoadjuvant and Adjuvant Therapy
- Pediatric Procedures
- Practice Management Pearls
- Social Media Reviews in Practice
- Surgery's Evolving Role in Melanoma Management

Educational Objectives

- Analyze skin cancer diagnosis based upon the most current visual and histologic diagnostic criteria.
- Select skin cancer treatment options guided by the latest evidence-based data.
- Integrate new and evolving skin cancer prevention techniques into patient care.

- Employ current medical and surgical methods in the treatment of skin cancer and pre-cancerous lesions.
- Apply recent political and regulatory updates affecting dermatologists and Mohs surgeons.
- Utilize varying surgical techniques in skin cancer treatment using Mohs micrographic surgery.
- Select new and refined approaches to post-excision reconstruction.

Accreditation and Designation Statements

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of PeerPoint Medical Education Institute, LLC and American Society for Mohs Surgery. The PeerPoint Medical Education Institute, LLC is accredited by the ACCME to provide continuing medical education for physicians.

The PeerPoint Medical Education Institute, LLC designates this live activity for a maximum of 26.25 *AMA PRA Category I Credit(s)*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

About the American Society for Mohs Surgery

The ASMS is a professional medical education society with over 1100 members. Physician members are primarily Board-certified dermatologists with extensive training in dermatologic surgery and the Mohs technique. Due to the high incidence of skin cancer worldwide and the efficacy of Mohs surgery in the treatment of basal cell and squamous cell carcinoma, we encourage high-quality Mohs training for all surgically oriented dermatologists. We also welcome participation by international physicians in other specialties who perform the Mohs technique in their respective practices.
